HOME PLANT SOLUTIONS

Retail • Garden • Commercial

Visit us online

Friends,

For many of you, this will be your first time ordering with Pottery Designs, and we want to take a moment to thank you for considering joining our family. While Pottery Designs is a new name in the retail market, our sister company, Architectural Supplements, has been around since 1962. We are the premier supplier of plant containers to the commercial plant industry and that is in large part due to our high level of customer service and product quality. We feel that now is the right time to bring that same customer-centric reputation to the residential market. Should you ever need us, we are just a phone call away, and we hope that you will consider trusting us with your fiber clay and fiber stone needs this season. We are always looking to hear from you, so please reach out if there is anything we can do to help you succeed this year.

## Why Pottery Designs?

- **Quality** | We are not your typical import company with multiple vendors. We are entirely vertically integrated and control product quality from start to finish.
- **Pricing** | Favorable pricing on fiber clay items that allow you to lower your inventory costs.
- **Shipping** | With distribution available on both coasts, we ship next business day with orders typically arriving within two business days.
- **Design** | Elegant designs, refreshed each year to match the latest trends.
- **Real People** | We are a family run business and have been in the plant industry for almost 60 years.

All the best,

**Jason Feinman, CEO**  
Founder of Pottery Designs

ASI's newest sister company, Pottery Designs offers a refreshingly modern line up of fiber clay planters that can be used in or outside the home. Designed for residential use, but flexible enough for the modern workspace, these planters are a fantastic resimercial choice to brighten up any space.

At Pottery Designs, each pot is hand crafted from clay and reinforced by a strong fiberglass mat. These planters are frost resistant, UV stable, and cost effective. Moreover, they are an environmentally friendly product, using water-based paints and absolutely no resin. If you are looking for a product that shows the truth in its materials, look no further. Pottery Designs offers some amazing textured planters at very attractive prices.
